PREFACE.

In the preparation of the tables contained herein the intention has been to give, in the most condensed form, all the figures necessary for the convenient and rapid calculation of interest at **ANY RATE** per annum, on \$1., \$10., \$100., etc., up to \$1,000,000. and on such amounts as can be readily deduced therefrom.

The mode of procedure is to multiply the days by the interest rate and to look up in the tables the resulting number. Opposite the number will be found the interest on \$1. Where a final 5 counts more than $\frac{1}{2}$ in qualifying the preceding figure, a period (.) has been added in the "365 Days" tables.

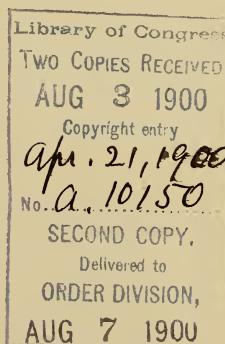

Multiplication of the days by the interest rate can, in most cases, be done mentally; where the interest rate includes fractions, such as 32nds, 16ths, 8ths and so on, reference may be had to the tables at the end of the book.

The numbers allow for an interest rate of about 5 per cent. for 90 days, a lower rate for a greater number of days, or a higher rate for a less number of days, which is believed to be sufficient for all practical purposes.

In the table "Days Multiplied by Fractional Interest Rate," the fractions $\frac{1}{8}$, $\frac{1}{4}$, $\frac{1}{2}$, $\frac{3}{4}$, $\frac{7}{8}$, and the days 16, 32, 48 and 64 have been left out, because the calculations can easily be done mentally. The days 10, 20, 30, 40, 50, 60, 70, 80, and 90 have likewise been omitted; the results can be found by taking 10 times the number under the heading "Days 1, 2, 3," etc.
